

# MAKING A HOLISTIC VIEW OF ŌTEPOTI DUNEDIN for the 21st Century...

(..or, how to bake a Dunedin doughnut)

**1. UNDERSTAND THE DOUGHNUT MODEL:**  
A global economic model for the 21st Century.

It is a holistic view with two concentric rings tracking key measures for both:

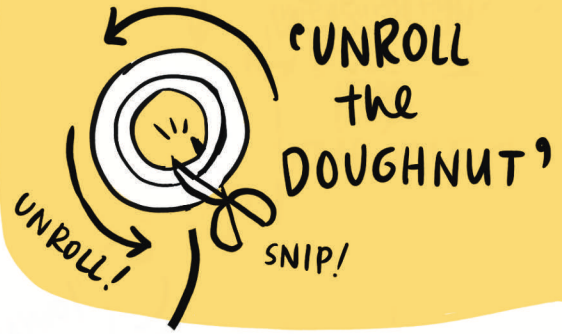

- = SAFE & JUST SPACE FOR HUMANITY** when measures are within this zone, all people are having their needs for a good life met within the means of our planet
- = ECOLOGICAL CEILING:** Above this line we exceed the 10 planetary boundaries risking permanent damage to earth's life support systems.
- = SOCIAL FOUNDATION:** Below this line we are not meeting the needs of people - housing, health, cultural, work etc.

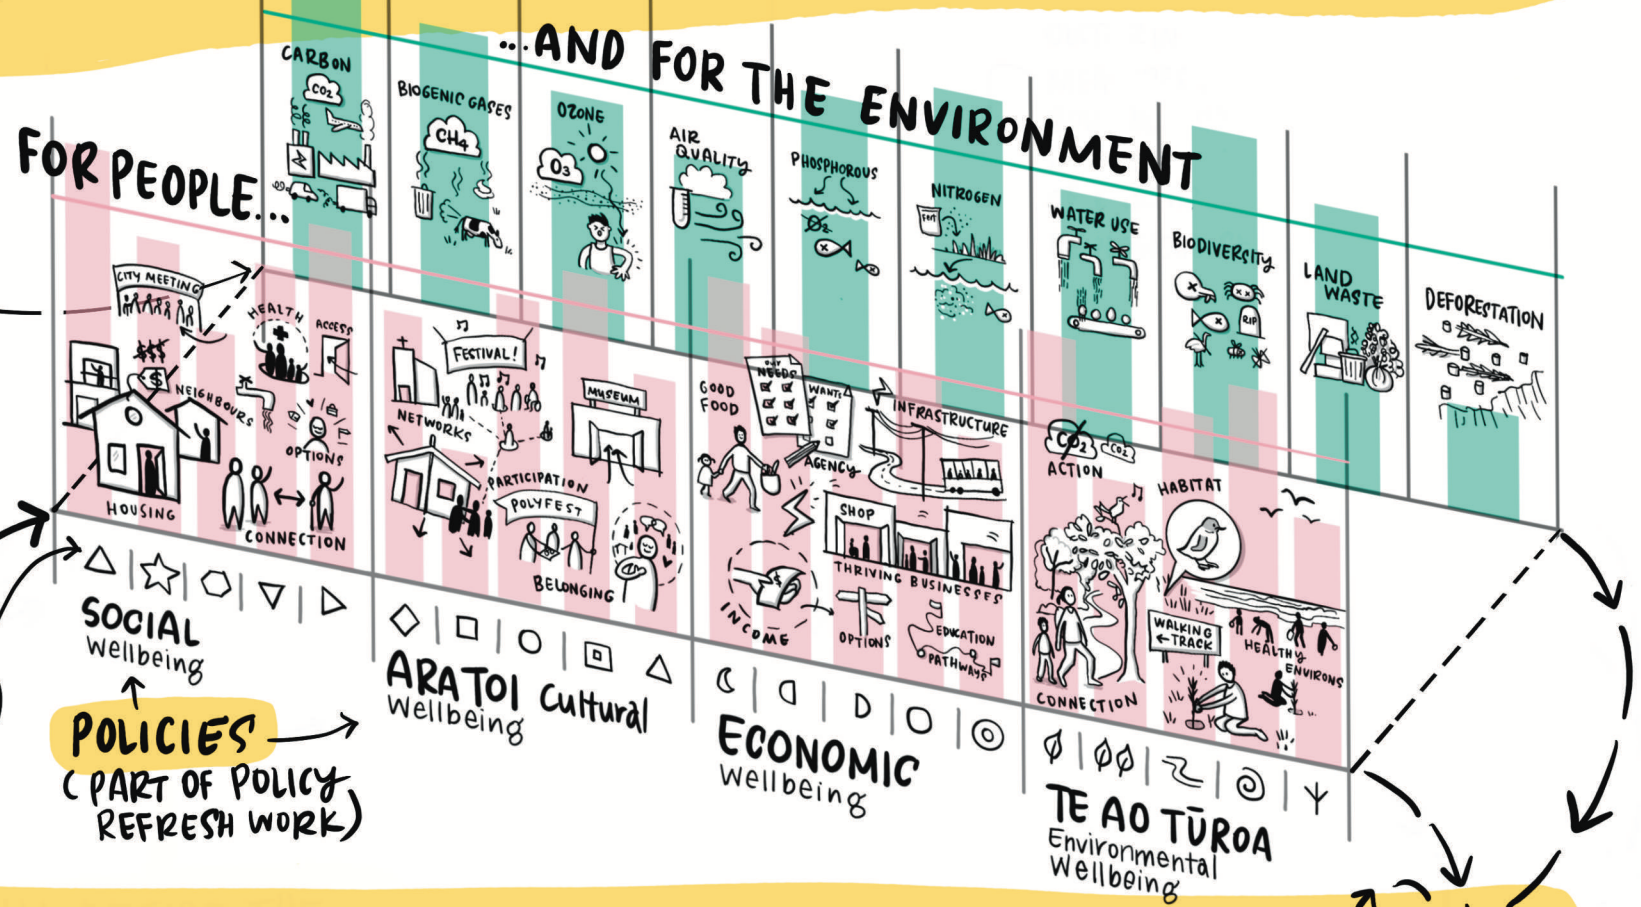

**2. ADAPT 'DOUGHNUT THINKING' TO A REGIONAL LEVEL WITH A CITY PORTRAIT...**

METHOD USES FOUR LENSES TO FIND WHAT MATTERS...

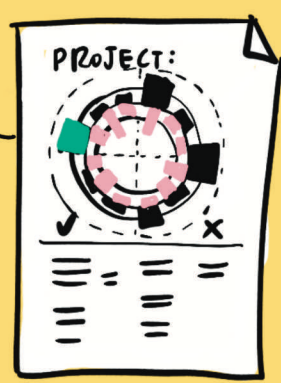

A PORTRAIT IS A LIVING TOOL THAT HELPS CONNECT POLICY MAKERS, COMMUNITIES AND PEOPLE - IT HELPS SHOW EVERYONE WHAT SUPPORTS GOOD LIVING!

**3. TOGETHER, DECIDE WHAT WE WANT TO MEASURE:**

**4. USE DUNEDIN'S DOUGHNUT TO INFORM OUR DECISIONS**

ONCE INDICATORS ARE CHOSEN, DOUGHNUTS CAN BE USED FOR SPECIFIC PROJECTS TO SHOW THEIR IMPACTS...

THEY HELP US UNDERSTAND HOW WE CONNECT TOGETHER...

...ARE A CONSISTENT, INTERCONNECTED FRAMEWORK ACROSS DECISION MAKING.

REROLL!
